PIN-SHARP: The great UK-made video jukebox

ALL it needs is the Apple logo and this piece of kit could be the keenly-awaited video iPod.

In fact it's a video jukebox from British firm **Designer Vision**, but it proves Apple does not have a monopoly on great looks.

Under the sleek white case, the DVX-

POD 7010 has 20Gb of memory, and you can transfer movies from a computer or record them digitally straight from your TV.

It'll play MP3 and WMA music files, as well.

The best feature is the pin-sharp seven-inch widescreen display, but it's not cheap at £445. Log on to www.designervision.co.uk for more info.
